Related subject: College & Blackwell/Mowden boundary

The proposed boundary between College & Blackwell and Mowden is Milbank Road to Dale Road and then a fictitious line from Dale Road to Woodland Road.

In the proposal a chunk of what is currently College Ward will be separated from the vast majority of Mowden Ward by two major roads: Woodland Road (A68) and Carmel Road N (B6280). These two major roads provide a much more natural ward boundary than Milbank Road and obvious community boundaries.

Indeed, myself and many of my friends and neighbours who live area between Milbank Road and Woodland Road feel much more connected to the current College Ward than they do to Mowden - many of our children went to Abbey Infants and Abbey Juniors, if we shop locally we will go to the shops along Cleveland Terrace rather than the shops in Mowden, I don't know anyone who goes to either the Model T or the Mowden for a drink. There is much more of a connection to the current College Ward and even the current Park West ward. Living in College Ward I feel absolutely no sense of connection to the area of town north of Carmel Road N.
