The proposals would see natural communities split apart. There is no consideration to what local people identify as their community in the new boundaries. Within the west people identify as living in Acomb when on green lane, kings way west, and across to Chapelfields. These proposals would see people living in king away west under holgate. These proposals would cause dispersal of local identity, confusion at election time, and no natural dicenation within the community of ward funding as those living in the new boundaries don't naturally come together. Consideration of where people already identify as there local area needs to happen. Online consultation is excluding a large proportion of the disadvantaged population we have in Westfield specifically. There has also been no consideration to that of what existing council services work within and moving into. These new wards would fracture the work of the citywide neighbourhood model again further disrupting and dispersing communities
