Related subject: South West York

The proposed pattern of wards is a big improvement on the current arrangements. It seems to group communities much better. these have formed naturally in York, often from physical features such as the river and railway lines.

I live in Dringhouses & Woodthorpe and the proposal to have a distinct Dringhouses ward makes a lot of sense to me- it reflects the community and I suspect may do a lot to increase engagement in local politics and community affairs.

I work across the whole of York and would support all of the changes proposed in the draft.
