Comment text:

My family have lived on the Tang Hall council estate since it was built over 100 years ago. The community is very active and I play an important role in this, helping out in the foodbank and breakfast club at. I understand why you are suggesting the boundary between Tang Hall and Heworth should be at Tang Hall Beck. The one thing I don't understand is splitting up the community of Derwentthorpe. This is a housing development complex by JRHT and I believe should be kept in one unit and hopefully with Tang Hall because many people from this community have already made good progress in joining in with Tang Hall. There has never been any connection between Derwentthorpe and Heworth Without. The style of housing in Meadlands and surrounding area are similar to many others in Heworth Without and the children already use the park. I'm sure the residents would be delighted to join our ward! If you are looking at areas to increase Heworth Without Ward due to the low density after the loss of Derwentthorpe I would suggest adding the area around Greenfield Park Drive off Stockton Lane, this is the closest area next to the parish council area. Once again it's an urban area and has been linked with Ward.
