Related subject: Heworth without ward

It can be seen that the old Heworth Ward Boundary is a distinct area which extends to the East, and South, where Christ Church on Stockton Lane is situated and the local Hempland Primary School.

It is semi rural but I understand it is to be developed into additional housing. Stockton Lane is a main thoroughfare through Heworth Without.

The current community links including the whole of Monk Stray, Hempland Primary School, Christ Church which serves the community and the Heworth Without Community Centre. They lie within the current Heworth Without Ward which shows that this is a community based on the Heworth Without Ward Boundary

The new Boundary will place a number of streets which identify with the current Heworth Without Community to a new Heworth Ward in which they have no community links.

The proposed boundary would also split the Stray area in two.

We currently have one councillor who is very supportive to the area.

Under the new proposals it is clear that whatever councillors we have will be more occupied dealing with the more intensely populated areas around Belle Farm Avenue, Byland Avenue, Dodswoth Avenue and Tanghall

The alteration off the boundary would have no benefit to the residents in the current Heworth Without Ward and I can see no benefit to the residents in the current Heworth Ward by including this group of houses into their ward.

I would therefore ask the boundary commission to keep this area in the Heworth Without Ward.
