Comment text:

The Wallsend boundaries are currently well set due to the topography and existing infrastructure of the area. The western boundary cannot be changed, as it bounds Newcastle local authority. The northern boundary is set by a major road which is a clear and effective boundary. It would be impractical to move the northern boundary to include properties from across the major road (Coast Road). The eastern boundary aligns with the housing estates and open green space, which is appropriate. The southern boundary is the river, which cannot be changed. I cannot see how moving the boundary lines of Wallsend Ward will result in a more effective and appropriate representation and not result in creating confusion for voters in the ward. In all of the communities I have visited the residents have a very strong connection to living in Wallsend and Wallsend Ward. There would be no benefit to residents in altering this.
