Comment text:

As a resident of Church Langley I OBJECT to this ward change that will drive a division between a strong community. Decisions will be passed from 'one side to the other' and all the fighting we have done for our area as a community will no longer matter. It is illogical to change just because you as councillors don't like the fact that basically some areas of Harlow have more residents than others which therefore affects the political outcome that you want not what we as residents want. This is one of the strongest community's I have lived in and our councillors for this area have always listened and fought for us. What will happen to the unadopted parts of this area will just become no man's land and be left like other parts of Harlow that no one cares about! Objection is the only way forward!
