Comment text:

Tenbury wells having half of the residents who use facilities in the town live in shropshire causes a significant amount of postcode lottery of services to vulnerable people. If you need help with applying for attendance allowance and you live in Burford you cannot access the Age uk service (through no fault of their own) in the library as it is Malvern hills service but have to travel by car to ludlow, approx 10 miles away. How is this promoting green sustainable services to people. Why is the boundary so, has it been considered to add Burford into Tenbury and then the council tax money can be spend on the resources and facilities accessed
