**Organisation Name:** unknown

### Comment text:

Liverpool and the United Kingdom need to become more democratic. The first past the post system (FPTP) is undemocratic and should be phased out. Single transferable vote (STV) is the fairest and most democratic system available. This is an ideal opportunity to introduce STV in Liverpool. I don't believe single seat wards are the way to go. Single ward seats and FPTP only benefit the Tories. They are a minority party in both the UK and Liverpool and their "fake democracy", where they continue to have all the real power, should not be imposed on the rest of us. Any changes should reflect the fact that the UK and Liverpool are multi party societies.
