I think Abington and Phippsville should be extended slightly to take over part of Castle at the west ends of Perry Street, Turner Street and Derby Road etc, to include all roads between Wellingborough Road and Kettering Road such as St Michaels Mount and Henry Street. At the moment, I live on Perry Street in the Abington and Phippsville part. It is only a short street and makes sense for the whole of it to be in the same ward as there are no geographical features that make it separate and as a community we have the same issues. Also we have a lot of ASB around the church on Perry St that effects us, but the church part is in Castle ward. This would make it easier for us to address concerns around ASB with the same councillors that represent us.
