It's very difficult looking at that map because some areas look massive whilst others look small when in actual fact they aren't. My suggestion is to see how many constitutes there'll be when divided by 77. Area will have to overlap as nurses in the community we had to overlap areas. Lot of factors how bust is each ward an they afford to take on extra. Duties will have to be reduced. I think if the map was correct in size people could have a better idea where the splits could be.
