

Malvern Hills District Council

Personal Details:

Name: Sarah Hart

E-mail: [REDACTED]

Postcode: [REDACTED]

Organisation Name: Malvern Wells Parish Council

Comment text:

The MWPC are grateful to the LGBCE for this second opportunity to comment on the proposed electoral boundary changes for the Southern Area of the Malvern Hills. With reference to the original report: "55. Councillor Satterthwaite proposed a specific divide in Malvern Wells, to allow for two single-councillor wards. He referenced that while Malvern Wells is part of Great Malvern's built-up area, Welland should be considered distinct, and that these communities would not be best served by a two-councillor ward, with limited public transport links and divergent community identities. He was of the view that the Upper Welland area of Malvern Wells parish has a distinct identity and has strong links to Welland in respect of local amenities. He proposed that all electors on Upper Welland Road and the residential streets off it should be included in a proposed Welland ward." To be clear, the unanimous view held by MWPC is that: in terms of the shared local amenities, educational and religious needs etc etc, plus the over arching AONB, Conservation Area and MHT considerations, the proposed boundary changes simply do not reflect the interdependency that exists between Upper Welland and Malvern Wells and so 'would not promote effective and convenient local government'. Whilst Malvern Wells and Upper Welland settlements have very different identities and a very different 'sense of place', facilities such as shops, schools, village hall, playing fields and village green are shared on a daily basis. For the record Upper Welland is some 3km distant from Welland, there is no continuous footpath and travel is via the unlit A4104 main road with a national (60mph) speed limit. Although travel between Upper Welland and Malvern Wells is not ideal it is shorter, safer and more sustainable. Whilst being less urbanised and in a semi rural location, Upper Welland probably faces many of the same everyday challenges as Longdon and other small, more outlying settlements but moving the electoral boundary would, in this case, not reflect the strong links between the communities of Upper Welland and Malvern Wells in terms of the shared core facilities and vested interests.

Letter of Objection from Malvern Wells Parish Council to proposed EBC Malvern Wells (Southern Area Malvern Hills) re Upper Welland to Welland and Longdon

The MWPC are grateful to the LGBCE for this second opportunity to comment on the proposed electoral boundary changes for the Southern Area of the Malvern Hills. With reference to the original report:
*"55. Councillor Satterthwaite proposed a specific divide in Malvern Wells, to allow for two single-councillor wards. He referenced that while Malvern Wells is part of Great Malvern's built-up area, Welland should be considered distinct, and that these communities would not be best served by a two-councillor ward, with limited public transport links and divergent community identities. **He was of the view that the Upper Welland area of Malvern Wells parish has a distinct identity and has strong links to Welland in respect of local amenities. He proposed that all electors on Upper Welland Road and the residential streets off it should be included in a proposed Welland ward.**"*

To be clear, the unanimous view held by MWPC is that: in terms of the shared local amenities, educational and religious needs etc etc, plus the over arching AONB, Conservation Area and MHT considerations, the proposed boundary changes simply do not reflect the interdependency that exists between Upper Welland and Malvern Wells and so *'would not promote effective and convenient local government'*.

Whilst Malvern Wells and Upper Welland settlements have very different identities and a very different 'sense of place', facilities such as shops, schools, village hall, playing fields and village green are shared on a daily basis.

For the record Upper Welland is some 3km distant from Welland, there is no continuous footpath and travel is via the unlit A4104 main road with a national (60mph) speed limit. Although travel between Upper Welland and Malvern Wells is not ideal it is shorter, safer and more sustainable.

Whilst being less urbanised and in a semi rural location, Upper Welland probably faces many of the same everyday challenges as Longdon and other small, more outlying settlements but moving the electoral boundary would, in this case, not reflect the strong links between the communities of Upper Welland and Malvern Wells in terms of the shared core facilities and vested interests.
