

Proposed Electoral Boundary Changes.

The parishioners of Leverington have intimated that if the proposed boundary changes go ahead, they will be at a disadvantage because of the extra travelling involved and also having to cross a busy A1101 to get to the Polling Station. The disabled using mobility scooters, the walkers and those using cycles will have great difficulty and consequently will not bother to cast their vote.

The accessibility to a Polling Station is paramount to the accurate recording of the wishes of everyone for their country and these wishes should not be ignored, therefore the boundary change for the people of Leverington is not feasible and should not be put into effect.
