**Petition to reject the proposed boundary changes that will remove Coalway Road from Penn Ward and make it part of Graiseley Ward and change Goldthorn Hill, Waverley Crescent, Marlbrook Drive and Coton Road from Penn Ward to Blakenhall Ward.**

We, the undersigned, are opposed to the proposed Ward boundary changes affecting Coalway Road, Goldthorn Hill, Waverley Crescent, Marlbrook Drive and Coton Road

We call on Council to:

1. reject the proposed plan to change Ward boundaries
2. fully consult with residents on any future proposals before decisions are made.

Reasons:

1. The proposed changes will remove the clear and long-standing boundaries that currently define the area of Penn and help to contribute to Penn's community identity.
2. The proposed changes may well affect residents' ability to choose local schools for their children.
3. Penn has a clearly identifiable community identity derived from its location, housing stock, community groups, local services, recreation facilities, retail trade, places of worship, schools, libraries etc.
4. The proposed changes are likely to have a detrimental financial impact on residents.

Decision to reject the proposed boundary changes that will remove Coalway Road from Kew Ward and make it part of Cradley Ward and change Goldthorn Hill, Waverley Crescent, Marlbank Drive and Cuson Road from Road Ward to Blakenhall Ward.

We, the undersigned, are opposed to the proposed Ward boundary changes affecting Coalway Road, Goldthorn Hill, Waverley Crescent, Marlbank Drive and Cuson Road.

We will go forward to

1. reject the proposed plan to change Ward boundaries
2. ally consult with residents on any future proposals

Reasons

1. The proposed changes will remove the best and long standing boundaries that currently define the area. Kew and help to contribute to Kew's environment identity.
2. The proposed changes may well allow houses in a close knit area to be sold to children.
3. Kew has a clearly identifiable community, groups, local services, recreation facilities, retail trade, housing stock, community groups, local services, recreation facilities, retail trade places of worship, schools, libraries etc.
4. The proposed changes are likely to have a detrimental financial impact on the area.

The diagram consists of a 4x4 grid of squares. Each square contains a unique pattern of line segments representing directions:

- Top-left: A single vertical line segment.
- Top-right: A single horizontal line segment.
- Second row, left: A single horizontal line segment.
- Second row, right: A single vertical line segment.
- Third row, left: A single vertical line segment.
- Third row, right: A single horizontal line segment.
- Bottom-left: A single horizontal line segment.
- Bottom-right: A single vertical line segment.

These patterns are used to represent the four basic directions (up, down, left, right) and their combinations in a 2D coordinate system.

Petition to reject the proposed boundary changes that will remove Cusway Road from Penn Ward and replace it part of Craykeley Ward and change land from Penn Ward to Hakehill Ward

We, the undersigned, are opposed to the proposed Ward boundary changes affecting Cusway Road, Hakehill Hill, Waverley Crescent, Marbrook Drive and Cusway Road

1. reject the proposed plan to change Ward boundaries
2. fully consult with residents on any future proposals before decisions are made

Reasons:

1. The proposed changes will remove the area of land being consulted upon from the ward and the residents of the ward will be disadvantaged
2. The proposed changes may well affect residents living in the area being consulted upon
3. Part has a clearly defined community identity derived from its location, history and character
4. The proposed changes will affect the character of the area being consulted upon
5. The proposed changes will affect the character of the area being consulted upon

A complex maze with many paths and dead ends, designed for a search algorithm. The maze is rectangular with a grid-like structure. It features numerous horizontal and vertical corridors of varying widths, creating a dense network of paths. There are several dead ends and loops throughout the maze. The entrance is on the left side, and the exit is on the right side. The maze is composed of black lines on a white background.
