I would like to express my strong support for the removal of the land to the rear of 5-33 Randalls Road from the list of sites for potential development. The site is currently designated Green Belt and fulfils its purpose. It is the only large open space in a densely populated area comprising several blocks of flats in addition to houses, many of which have been built in the last 3-4 years. Local residents make constant use of the area (for which it was intended) by walking, jogging and exercising their dogs, while ramblers and visitors enjoy the existing rights of way. The site is a lung in the heart of Leatherhead and the cutting down of trees and endangering the habitat of the birds and wildlife which currently live there would be counter to the original thinking and planning of Green Belt land. For these reasons I believe the decision to remove this site from the original Plan was the correct one in terms of legality and soundness.
