Comment text:

Castle Point has become very crowded over the years. We do not now have the infrastructure to house more residents. Shortage of doctors, school places, dentists, hospitals etc,. The roads have become overcrowded with frequent delays making people late for work, appointments etc. I recently missed a flight due to a burst water main which caused mayhem for all travellers, these are becoming more frequent. When there is such an incident then there is no alternative but to sit in traffic causing more pollution. We have a lack of parks and open spaces for our children to play in, a small open space was recently going to be built on which would once again cause more shortages of those mentioned. It is not a case of NIMBY it is a case of common sense. When there are more decent roads and good infrastructure then start more building but not before. As a pensioner I can no longer see a doctor unless I wait for days or receive a telephone appointment. How can he doctor see an injured leg over the phone? I moved here in 1969 and have witnessed the decline of this once lovely place to live. Please no more housing to be built..
