### Comment text:

We strongly oppose the Wychavon further draft proposals (Latest Consultation), for the following reasons: 1) The Parish of Wick is a rural parish, currently part of the Fladbury Ward. Fladbury Ward comprises six similar rural parishes with an expected population of 2671. Wick currently has approximately 1/6 of the representation in Fladbury, which is a fair portion, among like-minded parishes that are focused on requirements of rural communities. 2) If Wick is included in the Pershore Ward, as per the Wychavon further draft proposals, Wick will be the sole rural parish joined into Pershore, a largely urban parish, with an expected population of 7284. Wick would have a reduced representation of approximately 1/16, which would have little influence in a ward that will be focused on requirements of an urban community. We are happy with the ward boundaries being left "as-currently-is", especially as the First Consultation split the Little Comberton and Great Comberton Parishes into different wards.
