I have no issue with the Walton Vale boundary, but I am puzzled as to why on your map you are showing the Liverpool Council boundary as going all the way up to Park Lane when many years ago you moved the street signs showing entrance to City of Liverpool nearer to Eastbourne Road, in effect reducing the size of Liverpool and increasing the size of Sefton MBC, therefore placing Aintree racecourse out of the City of Liverpool. Your street posts require repositioning to the correct place. Also when you moved these street signs/posts you placed all of Aintree within Sefton MBC but looking on your new proposal you are placing Aintree within Liverpool again. Please make up your mind as to where Aintree belongs, taking into account it used to cover parts of Walton Vale, Hall Lane and extending as far as the old Queen Mary school on Long Lane.
