Organisation Name:

### Comment text:

I think this is another unnecessary piece of bureaucracy. Rather than wasting time and money on a task like this, why not invest into services, community initiatives and the environment? Now is not the time to make unnecessary decisions like this. It is the time to help the region bounce back post covid. This to me seems like a hugely pointless and time consuming political task. Stop messing around and do some that actually has a meaningful impact on society and the environment.
