Organisation Name:

Comment text:

All the Farnham wards should be given the status of a Unitary Authority, run by the Farnham Town Council. Geographically, this would make sense and also historically. The town was administered by the Farnham Urban District Council which dealt with our planning issues until 1974. Since being part of Waverley Borough Council, we have been administered remotely by the Council in Godalming. Parts of our beautifully conserved town have recently been developed insensitively by the Borough Council at enormous expense and with mounting debts. The development is not viable due to the outdated plan for many new shops and restaurants which are no longer needed. Our local council would never have made such an error of judgement.
