Related subject: Numbers of councillors

I believe that if you were to cut counsellors by 26 this would bring us in line with similar numbers elsewhere, this could be used to fund leisure centres that contribute to well-being and health and provide an important safe place for young people (e.g. Dunston pool and its). Perhaps it could also be used to improve road signage and fill potholes to keep cyclists safe. It is public money and should be used for the public good and not fund admin heavy systems (please).
