**Related subject:** Kettering ward boundary changes

I grew up in Brambleside (The Saplings), and currently live in All Saints (Cowper Street). The two wards are deeply interconnected and together form a cohesive, interdependent part of Kettering that shares an active sense of community, served by a proactive, visible team of councillors who are passionate about this part of town and have done a huge amount of material good to make us feel pride about where we live. The representation of All Saints would suffer greatly if subsumed into 'Kettering Central' (the challenges of the town centre area need a focus of their own) and future councillors would not be able to meet the needs of my area as a result. There is an existing organic blend between my two wards, which makes perfect sense for residents living in them - to change this would be a huge backwards step for local democracy. Thank you
