I feel this is quite confusing to non politician people .

For me personally I would prefer to be out of Sefton and merge with Lancashire.

Southport has no voice whatsoever in Bootle and has a labour stance whereas Southport is conservative.

There is a huge divide between Southport and bootle and decisions are made with little or no regards for us .

Also there is no transparency over finances. The beach is vile , the pier issue is a joke and as for the huge investment in the strand well that does not make financial sense .

I would much rather take my chances with Lancashire rather than stay with bootle .

There is no transparency and there is no voice or representation for the people of southport and Ainsdale in bootle
