Related subject: Boundary changes to Trinity ward.

The proposed boundary changes will have a significant negative impact on my representation to local government. The merger with more rural areas will create significant tension as there will be a huge amount of diverse needs to be met. It does not make sense to lump in a huge part of what is effectively the heart of stroud with a rural area. Look at all the facilities that are used across the town- why are they going to be represented by a predominantly rural constituency? Does not make sense in any way and I feel really disenfranchised and distressed that my voice will no longer be clearly heard by people with other issues. Not a good idea, this proposal should be binned.
